Stage 2 Submission Changes Report

- **Owns is not Translated:**
  Changed the ER Diagram to reflect what it was actually supposed to be. Reworked the ER diagram and updated it with the latest changes in doc folder.
- **Location and Antenna have wrong PK:**
  Added foreign keys (to License) as part of the primary key.
- **Coordinate has wrong attributes:**
  Fixed the typo in the relational schema, we duplicated it by mistake.
- **Specifies is not translated:**
  Changed the ER diagram, we no longer have specifies.

In our re-design of the ER Diagram, we added proper foreign keys that were missing in the original implementation and after carefully reviewing the data fixed the relations as well.

From the above, we have fixed all the previous comments and issues on stage 2 in this stage.
